SUMMARY

Systems Programming: Hands-on experience in C++, C, Python, JavaScript, and TypeScript across game engine and web applications
Projects: Builds and ships software from scratch, including a certification practice web app, a C++ game engine, and a live multiplayer web game
Technical Practice: Applies data structures, memory management, and design by contract principles to write maintainable, testable code
Leadership: Led 5S implementation across a 2 million square foot facility, reducing downtime by 20%, and trained staff on safety and process compliance
Education: Completing a Bachelor of Science in Computer Science at Lewis University

TECHNICAL SKILLS

Programming Languages: C++, C, Python, Java, JavaScript, TypeScript, SQL
Systems & Architecture: Data Structures, Operating Systems, Systems Analysis and Design, Networking Fundamentals, Memory Management, Design by Contract, Modular Architecture, Data Oriented Design
Software Development & Tools: Git, GitHub Actions, Linux, CMake, SQLite, raylib, Vite, Playwright, JSON
Web Development: HTML, CSS, JavaScript, Cloudflare Workers, Cloudflare D1
Data & Analytics: Data Analytics, R Studio, Advanced Statistics, MSSQL
Productivity: Microsoft Office

EDUCATION

Bachelor of Science in Computer Science — Expected May 2028
Lewis University, Romeoville, IL

Associate of Applied Science in Computer Programming, GPA 3.4 — May 2026
Joliet Junior College, Joliet, IL | Graduated with Honors

Associate of Applied Science in Culinary Arts, GPA 3.0 — September 2024
Kendall College at National Louis University, Chicago, IL

CERTIFICATIONS

LPI Linux Essentials — Completed October 2026
CompTIA A+ — Completed October 2026
Networking Essentials | Cisco Networking Academy — Completed March 2026
CompTIA Network+ — In Progress, Expected December 2026
AI Fundamentals for the Workplace | Kaplan — In Progress

PROJECTS

Terminus CertSim (TypeScript) | *Personal Project* — Live

- Built an installable, offline capable web app that simulates bash, Command Prompt, and PowerShell terminals for LPIC-1 and CompTIA exam practice
- Organized four learning paths and 12 guided labs that pair short lessons with hands-on tasks and knowledge checks, plus a free practice sandbox and command reference
- Deployed on Cloudflare Workers with optional GitHub sign-in backed by a D1 database, with Playwright end-to-end tests and GitHub Actions workflows
- Directed AI-assisted development, reviewing generated code and lesson content for accuracy against exam objectives

Rally (JavaScript) | *rally.wayne-mitchell.com* — Live

- Built a live multiplayer rock paper scissors game with accounts, room codes, a leaderboard, and a bot with three difficulty levels, deployed on Cloudflare Workers

RPG Game Engine (C++) | *Personal Project* In Progress

- Building a modular game engine in C++ and raylib covering rendering, combat, inventory, AI behavior, and event systems
- Designed a tile-based world (Map, Chunk, Tile) and custom Design by Contract macros to catch invalid state early; scripting and modding support planned

WORK EXPERIENCE

Cresco Labs, Joliet, IL January 2025 – Present
Kitchen Agent

- Produce high-quality small batch products under strict GMP, GDP, PPE, and regulatory compliance
- Maintain meticulous batch and process records for full traceability
- Collaborate with R&D and Quality teams to test and refine product formulations
- Standardize production workflows, improving consistency and reducing rework
- Track ingredient expiration dates across inventory, with zero expired ingredients used in 2025
- Supported the full launch of a new chew product line while keeping all other scheduled production on track
- Contributed to the facility's highest Kiva audit score to date

Amazon, Channahon, IL August 2021 – March 2025
5S Team Lead, December 2021 – April 2024

- Led 5S implementation across a 2 million square foot facility, boosting efficiency and reducing downtime by 20%
- Trained staff on organization, safety, and process compliance, reducing workplace injuries and increasing overall productivity
- Conducted workflow audits and optimized supply replenishment to maintain productivity
- Streamlined facility workstation layouts to enhance safety and speed

Warehouse Associate, August 2021 – December 2021, April 2024 – March 2025

- Learned all 6 PIT-operated machines
- Cross-trained into various departments and assisted based on business needs

LEADERSHIP, ACTIVITIES, AND VOLUNTEER EXPERIENCE

Volunteer, Northern Illinois Food Bank, Joliet, IL | 2026 – Present

- Assisted with food sorting, packaging, and distribution to support community members in need

Member, Lewis University Cybersecurity Club, Romeoville, IL | August 2026 – Present

Associate Safety Committee Member, Cresco Labs, Joliet, IL | March 2025 – Present

- Participate in job safety analyses and ergonomic risk assessments
